9,

It is proposed to install a new electric railway line from Bielsko over the 16 kilometers stretch to the village of Szczyrk (4943M - 1902E). This was to be started in early 1952. At the present, this line uses buses, but these are very insdequete and always evercrowded, Since 1947, bus lines in Bielsko have used Soviet ZIS, Hungarian Mayag and Italian Fiat buses. Fix was the best bus, carrying 68 passengers; however, since the beginning of 1949, there have been no spare parts for these buses. There is a serious transportation problem in Bielsko. This particularly effects the thousands of villagers from the surrounding area who work in the factories in the city and must commute.

10.

very heavily guarded and heavy guns were manufactured here. The plant had Russian technicians. It was conjectured that parts for jet engines were manufactured here but employees worked in separate sections on small parts and had no real conception of the end product.
